

CR railclamp

Product information

General:

The CR rail clamps are designed to lift single rails securely and safely. The clamp is designed to fit most types of rail sectionsizes currently in use. The clamp has a narrow profile to enable attachment to an individual rail that is stacked side by side with other rails. The clamp is locked onto the rail-head via a leveroperated spring mechanism. It is recommended to use clamps suspended from a lifting beam for long rail lengths.

Option:

Clamps can be supplied with a short length of chain and liftingeye. This **MUST** be specified at the time of order.

Code	WLL ton	Type	Number of rails	Weight kg
CR1000	1,000	CR1000	1	13
CR2000	2,000	CR2000	1	13
