

## HAC S Aluminium Hydraulic Cylinder

### Product information

Holmatro aluminum cylinders (HAC) - Spring or hydraulic return

#### Unique specifications:

- Up to 50% lighter compared to steel cylinders - easy & ergonomic
- Duo power ring; a combination of a superior seal and an extremely strong composite bearing for a longer life span
- XL saddle optimally protects the plunger and guides the load as effectively as possible
- The plunger is coated with a hardened anodized layer, which makes it extremely wear & corrosion resistant

#### Standard supplied with:

- High flow female coupler A118
- Flat saddle
- Almost every cylinder from 30 ton equipped with handle(s) for easy carrying and positioning

#### Also available:

- Tilting saddles
- Hydraulic pump units 700bar to control your system
- Hydraulic hoses 700bar
- System components to complete your hydraulic system

#### Extra information:

Aluminum cylinders should NOT be used for manufacturing applications with a very high number of cycles. For the safe use of aluminium cylinders, Holmatro recommends a maximum of 5000 cycles at the maximum working pressure.

**Material:** Body: Aluminium

Part Code	Code	WLL ton	stroke length mm	Closed height mm	required oil cc	angle A2 °	Weight kg
