

Bolt + Safety Bush Pewag CBHW

Product information

The spare parts set for CW Connex connecting links and CARW round sling connecting links know no compromises when it comes to safety. For this reason, we recommend replacing each safety set after it has been assembled/disassembled three times - quality assured. The bolt comes with a black coropro coating and looks rather unremarkable - however, its modest exterior hides an unsurpassed level of know-how and expertise!

Grade: 10
