## Verotop E

### Informations du produit

### Câble antigiratoire

#### Informations générales

Le Verotop E est un câble souple antigiratoire avec des torons extérieurs compactés.

#### Caractéristiques

- Entièrement lubrifié et disponible en finition acier galvanisé ou acier clair.
- C'est un câble très souple
- Il doit être utilisé avec émerillon.
- Il possède une résistance à la rupture élevée et une très bonne résistance à la force d'écrasement du tambour

**ISO 4309 Catégorie câble N°** : tous les diamètres **RCN.23-2**.

**Marquage:** Selon la norme

**Norme:** EN 12385-4

**Coefficient de remplissage:** 0.7

**RCN:** 23-2

**Tolérance Ø:** +2% à +4%
