

Grue Offshore

Verotop XP

Informations du produit

Câble antigiratoire

Informations générales

Le Verotop XP est un câble antigiratoire surtréfilé avec les torons compactés et une âme recouverte par une couche plastique.

Caractéristiques

- Une charge de rupture élevée dans la gamme des câbles antigiratoires.
- Il a une très bonne stabilité structurelle et offre de bons résultats de tenue à la fatigue.
- Il empêche l'usure interne et protège l'âme du câble en environnements corrosifs.
- Une résistance supérieure à l'écrasement et une meilleure résistance à l'abrasion.
- Il possède un comportement parfait pour un enroulement multicouche

ISO 4309 Catégorie câble N° : tous les diamètres **RCN.23-1**

Marquage: Selon la norme

Norme: EN 12385-4

Coefficient de remplissage: 0.745

RCN: 23-1

Tolérance Ø: +2% à +4%
